- MongoDB

SUMMARY

Software Engineer with experience in automation, ETL development, data engineering, and full-stack development. Proficient in the MERN stack, Python, SQL, Databricks, Selenium, and various data analysis libraries. Skilled in building scalable applications, automating workflows, and developing data-driven solutions.

EXPERIENCE

TATA CONSULTANCY SERVICES

Nov'23 - Present

System Engineer (Sept'25 - Present)

- Developing ETL workflows to extract, transform, and load data from multiple sources into data platforms for analytics and reporting.
- Automating data processing, workflow orchestration, and CI/CD pipelines on Databricks using Python and various libraries to improve efficiency and reliability.

Assistant System Engineer (Jul'24 - Aug'25)

- Performed data analysis using Python, SQL, Pandas, and other data processing libraries to generate actionable insights and support business decision-making.
- Designed and developed POCs using MERN Stack, Selenium, and Cucumber to evaluate application development and test automation solutions.

Graduate Trainee (Nov'23 - Jun'24)

- Developed frontend modules for an assessment platform using React, JavaScript, HTML, and CSS.

CERTIFICATIONS

- **Data Analysis with Pandas and Python** - Udemy.
- **MERN Stack** Development - Intern Nexus
- **Web Automation Testing** using **Nightwatch.js** - Udemy
- **Agile Fundamentals:** Scrum & Kanban - Udemy
